

**SAMUEL JAMES**

Network Deployment Build Lead

AWS Global Network Deployment • Data Centers • Networking • AI Agent Engineering

Network deployment leader with 10+ years in mission-critical environments. As a Network Deployment Build Lead on AWS's Global Network Deployment (GND) org, I deliver data center network builds end-to-end — leading teams of 8-14, managing vendors, and driving quality from build to operations. I also engineer multi-agent AI systems (Kiro, Amazon Q, Claude, Codex) to automate infrastructure, documentation, and operational workflows.

PROFESSIONAL SUMMARY

Network deployment and infrastructure leader specializing in data center network builds — Cisco networking, VLANs, routing, switching, firewalls, and fiber & copper structured cabling at scale. As a Network Deployment Build Lead on AWS Global Network Deployment, I own build projects end-to-end: capacity and materials planning, scope of work and vendor management, device build and troubleshooting with engineers, and quality handoff to operations. Skilled in AWS cloud operations, Linux administration, and automation. I engineer multi-agent AI systems and use AI tools daily (Kiro, Amazon Q / Quick Suite, Claude, Codex) for infrastructure automation, documentation, and operational workflows. Known for leading teams of 8–14,

developing technicians, and delivering reliable results in high-availability, mission-critical environments.

</> FEATURED PROJECTS

Multi-Agent AI Dev Team ↗

A 6-agent AI engineering team built in Kiro — Architect, Backend, Frontend, Deployer, QA, and Manager — with per-agent model routing and security-fenced, least-privilege tool permissions. Automates design, build, review, and gated AWS deployment.

Built with Kiro • Claude • Codex

Home Lab Infrastructure ↗

Proxmox cluster with Linux servers, networking labs, VPN, automation, and self-hosted services for testing and continuous learning.

Demo coming soon

SA Wellness Platform ↗

Full-stack SaaS wellness application — React, TypeScript, Node.js, SQLite. Multi-tenant community platform with real-time engagement.
